GitHub: https://github.com/Har-dik25 Mobile: +91-7878600960

SKILLS

Languages: Java, Python, SQL
Frameworks: Flask, Fast API, NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, Tensorflow, GoogleADK
Tools/Platforms: MySQL, MongoDB, Git & GitHub, Docker, Azure, Power BI, Hugging Face, LLMs, Agentic AI, APIs, LangChain, CI/CD, Supabase
Soft Skills: Quick Learner, Team Player, Leadership, Adaptability

INTERNSHIP

Data Intern | Futurense Technologies | Certificate — Jun '25 – Aug '25

- Developed and deployed production-grade ML models to forecast lead volume and conversion rates.
- Cleaned and standardized high-volume marketing data to support end-to-end funnel and cohort analysis, ensuring near-perfect data consistency across reporting tools.
- Delivered Power BI dashboards to visualize funnel drop-offs, identifying 15% critical inefficiencies in CPL focused optimization strategies.

PROJECTS

Fake News Detection System | GitHub — April '26 - May '26

- Engineered a production-grade detection platform using PyTorch to process and classify over 72,000 political and journalistic articles with high accuracy.
- Designed a hybrid AI architecture that combines a BERT Transformer with a BiLSTM network, and further boosted accuracy by integrating classical NLP features like sentiment analysis and POS tagging.
- Prioritized Explainable AI (XAI) by building a custom attention mechanism that generates real-time visual heatmaps on the frontend, showing exactly which words triggered a "Fake" classification.

Tech: Python, PyTorch, HuggingFace (BERT), NLTK, FastAPI, Docker, Scikit-Learn, JavaScript/HTML/CSS

HRMS System | Live — Feb '26

- Architected a full-stack HRMS with Google Authentication, managing payroll, attendance, leave, recruitment, and employee workflows across 40+ tables and implemented role-based access control.
- Implemented a scalable FastAPI backend with Supabase and PostgreSQL using modular CRUD APIs, schema validation, and secure data handling, implemented payroll processing, leave approvals, audit trails, notifications.
- Created an interactive dashboard with graphs, KPI cards, workflow tracking, and real-time HR analytics for better decision-making improving throughput by over 40%.

Tech: FastAPI, Python, Supabase, PostgreSQL, Google OAuth, REST APIs, Pydantic, Uvicorn.

Legal Mind RAG| GitHub — Jan '26 – Feb '26

- Built an industry-grade RAG pipeline from scratch in core Python without LangChain/LlamaIndex, maintaining full control over every pipeline stage across 500+ Indian legal documents.
- Constructed a hybrid retrieval system combining ChromaDB (dense search) and BM25 (sparse search) fused via Reciprocal Rank Fusion (RRF), improving retrieval precision by ~25% over single-index baseline.
- Integrated a cross-encoder re-ranking layer and offline LLM inference via Ollama, keeping sensitive legal data fully local and achieving sub-2s response latency.

Tech: Python, FastAPI, ChromaDB, BM25, Sentence-Transformers, Ollama, React

CERTIFICATES

Oracle Cloud Infrastructure Certified Generative AI Professional | Oracle | Certificate — Sep '25
Oracle Cloud Infrastructure Certified Data Science Professional |Oracle | Certificate — Sep '25

ACHIEVEMENTS

5 Star on Hacker Rank in Python and SQL. — Oct '25
Completed 80+ Question on Leet Code. — Jun '25

EDUCATION

Lovely Professional University — Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.00** — Since Aug '23

ACI Senior Secondary School — Jhunjhunu, Rajasthan
Intermediate; **Percentage: 83.80%** — Apr '21 – Mar '22

ACI Senior Secondary School — Jhunjhunu, Rajasthan
Matriculation; **Percentage: 82.17%** — Apr '19 – Mar '20
